

KATYA KALACHE

SUMMARY

Currently a full-stack software engineering student at Holberton School, finishing the first 9 months of project-based training - no lectures, and no theory! Got my hands dirty from Day 0 and have been addictively coding since.

Looking for opportunities as an entry level full stack software engineer.

PROJECTS

- Wrote my own simple Shell and Printf function in C
- Cloned Airbnb's site using Python, MySQL, Flask, and Bash (ongoing)
- Working on Twitter clone using JavaScript, JQuery, HTML, CSS
- Working on Chinese characters decomposer (breaks Chinese character into its components and provides the meaning for each) in Python

EXPERIENCE

DOCKER, INC.

Community Relations Coordinator

DECEMBER 2014 - OCTOBER 2016

- Created over 50+ new meetup groups globally
- Organized hackathons to build and engage developers community
- Established Docker China's offices in Beijing

ONOVIAN

Founder
