Katya Kalache

Full Stack Software Engineering Student at Holberton School

ekaterina@kalache.fr

Summary

I am currently a full stack software engineering student at Holberton School. I am finishing my first 9 months of project-based training. No lectures, no theory! Got my hands dirty from day 0 and been addictively coding since then.

Projects:

- Wrote my own simple Shell and Printf function in C language
- Cloned Airbnb website using Python, Mysql, Flask and Bash (ongoing project)
